Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Claims 1-23 are presented for examination.

Election/Restrictions

2. Restriction to one of the following is required under 35 U.S.C. 121:
 - I. Claims 1-9 are drawn to a method for storage of data of a plurality of network computers, classified in class 709, subclass 217.
 - II. Claims 10-13 are drawn to the preparation of data into packets for transmission, classified in class 709, subclass 236.
 - III. Claims 14-16 are drawn to gateway appliance for sending and receiving data from a storage location over the Internet, classified in 709, subclass 246
 - IV. Claims 17-23 are drawn to a bulk data storage facility primarily for resource allocation, classified in 709, subclass 226.

The inventions are distinct, each from the other because of the following reasons:

3. Inventions I, II, III, and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as a method to store data of a plurality of network computers. Invention II consists of preparation of data into packets for transmission. Invention III is drawn to a gateway appliance for sending and receiving data from a storage location over the Internet. Invention IV consists of a bulk data storage facility primarily for resource allocation. See MPEP § 806.05(d).

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. A telephone call was made to Paul D. Greeley on October 5, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
